

Organic compound

Liquid Humic Materia from VEGETAL origin

Humic compound specially formulated to apply to the soil substances that produces this 3 effects:

- ⇒ **Formation of stable complexes in the soil** with elements Ca, Mg, Fe, Zn or Mn. It's complex index is 120meq./100cc.
- ⇒ **Formation of macropolymers with the existent Phosphorous** in the soil or added. These will re-dissolved slowly as the Organic Matter decomposes, and the molecules of phosphorus will be liberated.
- ⇒ **It improves the capacity of Ionic Exchange** of the soil thanks to the power of formation of complexes with the Ca and clays of the soil.

All these properties will collaborate with the best utilization of the used fertilizers, as well as in the mobilization of the assimilable or partially assimilable elements of the soil.

FERTILIZER ELEMENTS	
Total humic extract*	35%
Lignosulfonates	54%
Watery vegetal extract	46%

* Due it is the only humic extract from VEGETAL origin and not from LEO-NARDITE, the actual machines can't calculate % of fulvic acids of the product. We 1/3 corresponds to humic acids and 2/3 to fulvic acids.

Manufactured by:

AGRARES iberia SL
B-64.816.895

CENTRAL DISTRIBUTION
POINT:
Ctra. Logroño-Zaragoza
Km 70, Nave6
26540 Alfaro, La Rioja
SPAIN

CONTACT:

Tel: (+34) 618 518 702
FAX: 940462034

Available in :
20L, 200L y 1000L

DOSE:

In general, is recommended a total dose 20L to 80L/Ha, depending on the needs of the crop and the condition of the soil, being applied as explained:

- ⇒ First application of 20 to 40 L/Ha at first appearing of leaves.
- ⇒ Then apply from 20 to 40L/Ha in one or several applications.

For trees the general dose is from 20 to 80 cc/tree.

CROPS	TOTAL DOSE	IRRIGATIONS
Young fruit trees	25-100 cc/tree	3 irrigations
Production Fruit trees	75-150 cc/tree	3 irrigations
Young citric trees	40-60 cc/tree	3 irrigations
Production citric trees	125-175 cc/tree	3 irrigations
Nursey	75-125 L/Ha	5 irrigations
Onion, garlic, leek, turnips, radishes, carrot, parsnip, potato, sweet potato, tigemut	100-125 L/Ha	2-3 irrigations
Beet, asparagus, cabbages, lettuces, chicory, spinach.	100-125 L/Ha	2-3 irrigations
Celery, fennel	75 L/Ha	2-3 irrigations
Artichokes, cauliflowers, broccoli, tomato, pepper, aubergine, melon, cucumber, watermelon...	100 L/Ha	2-3 irrigations
Gourd, zucchinis	100-125 L/Ha	2-3 irrigations
Strawberry (open air)	75 L/Ha	2-3 irrigations
Strawberry (nursey)	125 L/Ha	2-3 irrigations
Beans, peas...	100-125 L/Ha	2-3 irrigations
