

AGRARES STICK & FAT

CE FERTILIZER

CHARACTERISTICS:

AGRARES STICK it's a new formulation, rich in phosphorus and nitrogen, which incorporates molybdenum and boron in his composition, which applied by leaf favors the flowering and filling/fattening of the fruits. In addition, it reactivates the processes at cellular level that they favor the stick of the fruits in the branch of the tree, avoiding the falling.

DOSE:

Product for LEAF application

CROP	LEAF DOSE	MOMENT OF APPLICATION
Citric and fruit trees	100 cc/100L of water	To apply at beginning of flowering repiting every 10 days.
Horticulture (tomatoe, pepper...)	100 cc/100L of water	
Cucumber, melon, watermelon...	100 cc/100L of water	
Other crops	100 cc/100L of water	

Total Nitrogen.....6 % w/w (7,2% w/v)
 Ureic Nitrogen.....4,5 % w/w (5,4% w/v)
 Ammonia Nitrogen.....1,5 % w/w (1,8% w/v)
 Anhídride phosphoric(P2O5)soluble in water.12 % w/w(14,4% w/v)
 Microelementos:
 Boron(B) soluble in water.....1% w/w (1,2% w/v)
 Molybdenum (Mo) soluble in water.....0,2% w/w (0,24 % w/v)
 Density.....1,2 gr/cc
 PH.....4

COMPATIBILITIES:

AGRARES STICK & FAT is compatible with most of the fertilizers NPK of normal use, not to mix with acid products (sulphuric, phosphoric, nitric), with products of alkaline reaction, with products sulphurcalcic not with mineral oils.

WARNINGS:

S 36/37: To use gloves of protection and appropriate apparel.
