

# AGRARES Mildiu STOP

## CHARACTERISTICS:

**Systemic super potassium phosphite designed to absorb moisture from the fungus, which can be applied in a preventive and curative.**

## Applications and dose:

“AGRARES MILDIU STOP” has been developed to accomplish this basic objectives:

As self-defense generator due to the natural stimulation of phosphoric acid, which provides an excellent plant health against fungal diseases and particularly against mildew under preventive and curative treatments. Its systemic absorption is through the mass of bark and leaf plant and its use by fertirrigation translocation ensures the perfect product for the plant.

As a contribution of phosphorus to encourage root development and activity, and to expedite the formation of tubes and promote curdled.

It has proved useful against solanaceous MILDEW (*Phytophthora infestans*).

Prevents the plant from a minor ailment of vascular diseases such as *Verticillium dahliae*, *Fusarium oxysporium*, *Phytophthora capsici* (pepper).

Curative effect: it acts as “superdryer” absorbing moisture and drying the humidity of the fungus.

## DOSE:

### CURATIVE TREATMENT:

2L/Ha + 2L/Ha of BotrySTOP every 15 days

### PREVENTIVE TREATMENT:

By leaf:

1,5L/Ha /irrigation

By root:

1,5-2L/Ha

To apply every 15 days

## MILDIU STOP AS PHOSPHORUS CONTRIBUTION:

Contains 118,6% w/v soluble phosphorus (P<sub>2</sub>O<sub>5</sub>), corresponding to 137% w/v phosphoric acid. If we compare with the today's maximum concentration which is 52% phosphorus and 60% phosphoric acid, the difference is very noticeable.

## INCOMPATIBILITIES:

Should not be mixed with mineral oil, products or alkaline copper products.

Available in bottles of:

1L, 5L, 20L,
